Pharmaceutical and Life
Sciences Industries

Comprehensive Support of All
Supply Chain Management
Processes

Digitalize your Supply Chain
with a Single Integrated
Solution

Optimized to Ensure Product
Quality

Maintains Safety and Accuracy

Fully Compliant with Highly
Regulated Industries

AX for Pharma 365™ **AXP365 Pharma Supply Chain Management™**

Managing an efficient supply chain and an ever-growing number of supply chain partners is a major challenge. Pharmaceutical and Life Sciences companies struggle to tackle in the highly regulated industry they belong to.

Easily track products with an end-to-end integrated solution that prevents inconsistent or duplicated data. AXP365 Pharma Supply Chain Management™ has been specifically designed as a fully integrated solution with the purpose of serving the interests of pharmaceutical companies that care about increasing process efficiency.

The risk of endangering patients is eluded by an enterprise solution that increases operational responsiveness to changes and reduce human error deriving from manually entering data. Our solution complies with Good Automated Manufacturing Practice (GAMP) standards aiming to ensure the highest quality product and therefore the patient's safety.

With true end-to-end visibility into supply chain operations and utmost accuracy in terms of operational performance, transparency and reliability will be enhanced and conscious decision-making processes will increasingly be triggered.

*Full Product
Traceability and
Control over Processes
through a Supply
Chain Management
solution providing
a comprehensive
overview previously
given by the
coexistence of separate
ERP, LIMS, and MES
systems.*

AX for Pharma 365™

KEY BENEFITS

Ensure Trust in Product Quality

Increase trust in Product Quality for all the stakeholders involved in the supply chain and reduce product waste through end-to-end visibility. Increase Trust between supply chain partners using a common platform on which they all have end-to-end visibility.

Conscious Decisions

Manage interoperable data points coming from the interaction of multiple supply chains along with being able to act as a key driver of conscious business decision-making processes.

Increase Your Process Efficiency

By automating manual or paper-based processes, which besides being time-consuming practices, would otherwise lead to committing mistakes. Guarantee the timely and accurate flow of information through a fluid system of transparency and real-time awareness.

Strengthen Your Ability to Track

Monitor and track sub batches and containers. Sample in all locations and isolate them if faulty or damaged.

Ensure Compliance

Reduce the burden of audits and inspections with immutable record-keeping while simultaneously adhering to GAMP standards that improve your reputation and promote best practices on behalf of the patient's safety.

RESILIENT, AGILE AND TRANSPARENT SUPPLY CHAIN OPERATIONS

Preconfigured Out-of-the-box Solution

GAMP Compliance Helps Increase Satisfaction for All of Your Customers

Full Control Over All Your Supply Chains with Transparent Ability to Track Every Unit in All Locations

Constantly Enriched with New and Dedicated Features

Full traceability, end-to-end sub batch management

Advanced Production Control, Advanced Warehouse Management, Weighing & Dispensing, Advanced Quality Management

Electronic signature fully compliant 21 CFR Part 11

Full Label Management, Integration with Warehouse Management, Integration with External Labeling Printing Systems
