

AX for Pharma 365™

AXP365 Advanced Warehouse Management™

Distributing drug products and managing end-to-end logistics is a complex challenge for companies in the highly-regulated pharmaceutical industry.

Manage large volumes of orders and inventories while adhering to strict quality control procedures and stringent regulatory requirements.

Finding the right software to efficiently manage these processes is crucial and that's where AX for Pharma 365™ will help you. Powered by AXP365 Advanced Warehouse Management™, our enterprise resource planning system offers a fully-integrated Advanced Warehouse Management module that has been specifically designed to help pharmaceutical companies simplify, streamline, and expedite all logistics processes.

With real-time visibility and total control, essential information will be shared with all relevant people without impeding your workflows.

Fulfill orders accurately and ship products efficiently with a warehouse management solution designed for pharmaceutical and biotechnology organizations.

AX for Pharma 365™

KEY BENEFITS

Optimize Your Productivity

Enjoy faster order cycles along with increasing the data flow while ensuring accuracy. Combine this with the confidence over controlling the movement of materials through streamlined processes and improved visibility of all inventory. Experience shorter, more precise cycle and physical counts while reducing inventory and labor costs.

Streamline Processes

Manage inbound and outbound handling—including sales, purchases, and order transfers. In addition, warehouse operations support cycle counting, inventory movements, quantity adjustments, weighing and dispensing, and production operations.

Inventory Control and Management

Make inventory management a faster, easier, and safer activity by providing real-time information. Monitor all warehouse activities by tracking movement of all materials and products at any time in any location.

Strengthen Logistics

Ensure compliance with regulatory mandates while managing the systematization of individual components (e.g. raw material-picking, component verification, report actual quantity consumption, and report as finished).

Reduce Inventory Paperwork

Significantly reduce the paperwork associated with warehouse operations. Guarantee the timely and accurate flow of inventory and information through a fluid system of transparency and real-time awareness. Maintain reports, tickets, packing lists, and more, delivered digitally and fast.

FLEXIBLE, SCALABLE, AND INTELLIGENT—THAT'S HOW AXP365 ADVANCED WAREHOUSE MANAGEMENT™ MAINTAINS YOUR COMPETITIVE EDGE

GMP Compliance Increases Satisfaction for All of Your Customers

Improve Competencies

As You Augment Your Warehouse Operations, AXP365 Advanced Warehouse Management™ Grows with You

Full Control Over All Warehouse Activities with Transparent Ability to Track Every Unit in All Locations

Inventory Movements, Adjustments, and Inquiries

Product Consumption, Product Receipt, Picking Label Printing, Shipping

Fully Compliant with 21 CFR Part 11 and EU Annex 11

Weighing and Dispensing
